Southern Oregon's ScienceWorks Has Summer Events For Kids

BY KIDS FOR KIDS BRAINSTORM CHALLENGE

July 26 - 31

"By Kids for Kids" is a national program encouraging kids to think fast and creatively solve problems and come up with new ideas. During the week you can design your own toy car, build and play your own board game, and see what other kids just like you have invented. ScienceWorks is one of only 50 museums across the country chosen to participate in this program.
